## COLOR GRADER

---

Mangal Color Grader is used to check whiteness & brightness of chemicals, powder, flour etc. This sensitive photoelectric photometer accurately measures the diffused light reflected from the sample under test against that reflected from a standard white surface. An internal standard surface is provided with the instrument to enable calibration to be accurately checked, whenever desired.

### SPECIFICATIONS:

Power Requirements	: Main Operated
Display	: LED Digital Display
Sensors	: V ( $\lambda$ ) corrected silicon photodiodes
Filters	: Blue & Green
